DAILY STORIES

by Margaryta Marcos

Today I'm writing this blog about my oldest sister, Sofia. She's six years older than me. It's her birthday today and she's 21. She doesn't live in the same house as my parents and me, but her flat is in the same street. We live at number 22 Spring Street, and she lives in one of six flats at number 28.

Sofia is the first person I go to when I have a problem, and she always tries to help. She also helps me with my English homework. We all speak Spanish at home, but Sofia speaks English really well too as a second language. She knows some English from school, but she also listens to English music and watches English films. Another thing she is great at is dancing. She's teaching me the tango this week. Tango is really difficult, but I love the music and the dance.

My sister's interested in everything. She loves learning about science on the internet, and she often reads books about history in her free time. She also does three sports: football, swimming and running. She enjoys them all and is good at swimming. She likes camping, and she's learning to play the piano at the moment, too. She can't play very well yet, but she practises every day. She's also planning to learn the violin. She's a very active person! I really don't know how she has time to do so many things!

BLACK BEARS

Black bears live in the forests and mountains of Canada, the USA and Mexico. They usually eat grass and insects, but they eat other things too, including fish, small animals and the food people leave at campsites.

Adults are very big and they weigh between 90 kg and 270 kg. They are tall too: when males stand up on two legs, they are about 180 centimetres tall.

In winter, females have two or three babies, called cubs. They stay with their mother for about two years. Scientists think there are around 600,000 of these animals in the wild in North America, but there may be many more.
